Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments. The applicants discussed where in the specification they believe the amendment to claim 1 is supported. Amended claim 1 includes the limitation "said warping being directly applied to at least one of said exterior voxels" the applicants argue that support for said limitation is found in the specification (see page 7, line 29 to page 8, line 6), said claim additionally includes the limitation "and without resampling said three-dimensional model" the applicants argue that support for said limitation is found in the specification (see page 1, lines 22 to 26). However on September 1, 2004 during a phone interview SPE Mark Zimmerman was not convinced. The applicants' representative agreed to further discuss the merits at a future date.
